

2008 RACE TIRE SPECIFICATIONS

Hoosier[®]
RACING TIRE

“TIRES DESIGNED FOR CHAMPIONS”[®]

NO WARRANTY POLICY

Hoosier Racing Tire Corp. offers racing tires for sale only upon the conditions and the terms contained in this disclaimer of liability and indemnity. Due to many varied and different conditions which Hoosier Racing Tires and Tubes are exposed and because of the manner in which racing is conducted, Hoosier Racing Tire Corp. makes absolutely **no warranty**, expressed or implied, as to the fitness for a general or particular purpose or of merchantability in connection with any offer of sale of Hoosier Racing Tires and tubes. **“HOOSIER RACING TIRES AND TUBES ARE SOLD AS IS.”** Race tires are not tested or labeled to meet FMVSS 109 or ECE36 Safety Standards. Therefore it is dangerous and illegal to sell race tires for use on public highways. Any person selling Hoosier Racing Tires or Tubes for highway use agrees to indemnify and reimburse Hoosier Racing Tire Corp. for all loss, damage, or liability Hoosier Racing Tire Corp. may suffer because of such sales. Not applicable where prohibited by law. Not following these warnings **CAN CAUSE SEVERE INJURY OR DEATH**. For more information read tire labels, follow manufacturer’s warnings as molded in tire sidewalls and visit hoosiertire.com.

WARNING

Verify Correct Wheel and Bead Flange: All tires are designed to be used on wheels that are manufactured to Tire and Rim Association (T&RA) specifications and tolerances. Some rims are non-standard or damaged and it is necessary to inspect the rim flange to assure proper fit. Consult your specific rim manufacturer to determine if your rim can be used in this application. Never attempt to install and inflate a tire of one bead diameter on a rim or wheel of a different bead diameter. Use of Hoosier Racing Tires on wheels with incorrect bead flanges or wheels that do not meet T&RA standards can cause the assembly to fail and burst with explosive force sufficient to cause serious personal injury or death.

WARNING

Special Tire Mounting Instructions: Tire changing should be done only by trained personnel using proper tools and procedures. Failure to follow safe mounting procedures could cause faulty positioning of the tire and cause the assembly to burst with explosive force sufficient to cause serious injury or death. Always inspect tire for kinked beads or other possible damage that may have occurred in shipping or storage. Clean rim and lubricate beads with rubber lubricant. Always lock rim on mounting machine or place in safety cage. Use a clip on chuck, an in-line valve with a pressure gauge or adjustable regulator and remote inflation/deflation device. Have enough air hose to stay out of the trajectory. Stand back. (Refer to page 15).

WARNING

When seating beads never exceed maximum bead seating pressure as molded in tire sidewall. Never exceed manufacturer’s maximum inflation pressure.

WARNING

NOT FOR HIGHWAY USE: All Hoosier Racing Tires including DOT labeled Hoosier Racing Tires are designed for racing purposes only on specified racing surfaces and are **not to be operated on public roadways**. DOT labeled Hoosier Racing Tires meet Department Of Transportation requirements for marking and performance only and are **NOT INTENDED FOR HIGHWAY USE**. It is unsafe to operate any Hoosier Racing Tire including DOT tires on public roads. The prohibited use of Hoosier Racing Tires on public roadways may result in loss of traction, unexpected loss of vehicle control, or sudden loss of tire pressure, resulting in a vehicle crash and possible injury or death.

Exception – “PRO STREET” page 14.

WARNING

Service Life for Race Tires: Old tires can fail in use, causing loss of vehicle control and personal injury. Environmental conditions like temperature extremes, exposure to sunlight, electric arc, solvents, automotive fluids, and atmospheric pollutants accelerate the aging process. Hoosier Racing Tire strongly recommends that new (sticker) tires should be put in service within 2 years of date of purchase. Used (scuffed) tires have a shorter service life than new (sticker) tires. Poor storage and infrequent use accelerate the aging process.

WARNING

Chemical Treatment of Tires: Hoosier Racing Tires strictly forbids any chemical alteration of the tire carcass and/or tread compound, such as tire “soaking” or use of tread “softener.” Hoosier Racing Tire strictly forbids the physical defacement (removal, altering or covering), of tire sidewall markings in any manner. Failure to comply with this warning could result in premature or catastrophic tire failure and may result in serious injury or death.

WARNING

Application/Misuse: All Hoosier Racing Tire products are designed for a specific purpose. Consult with Hoosier Racing Tire Corp. for specific fitment and application. Utilizing Hoosier Tires in any form outside of their intended use constitutes **misuse** of the product and can **cause severe injury or death**. Hoosier Tires should never be used for Land Speed Record vehicles including Jet/Rocket cars.

NOTE: DOT labeled Hoosier Racing Tires meet Department of Transportation requirements for marking and performance only and are **NOT INTENDED FOR HIGHWAY USE**. It is unsafe to operate any Hoosier Racing Tire including DOT tires on public roads. The prohibited use of Hoosier Racing Tires on public roadways may result in loss of traction, unexpected loss of vehicle control, or sudden loss of tire pressure, resulting in a vehicle crash and possible injury or death.

DIRECTION OF ROTATION/MOUNTING INSTRUCTIONS

All Hoosier tires having directional arrows must be mounted so that the tire travels in the direction of the arrow. Hoosier tires having directional arrows will have them on both sidewalls. Directional arrows may not be on a tire that can have both left and/or right side application. All Hoosier tires not having directional arrows should be mounted as detailed below.

Every Hoosier race tire has a four character serial code embossed into ONE sidewall of the tire. All Hoosier DOT tires will also have two additional codes as required by the Department of Transportation. (Example: J7AB 4AX8 3701)

MOUNTING GUIDELINES FOR TIRES WITHOUT DIRECTIONAL ARROWS

CIRCLE TRACK RACING TIRES:

(Includes both dirt and asphalt tires)

Hoosier tires must be mounted with the **serial code** located toward the infield.

ROAD RACING TIRES:

(Includes catalog numbers beginning with 43, 44, 45, 46)

In most cases, Hoosier tires used in Road Race applications should be mounted with the **serial code** toward the center of the vehicle. Once a tire has been run in the proper orientation it is acceptable to remount the tire in the opposite direction to even out the wear.

DRAG RACING TIRES, INCLUDING DOT DRAG TIRES:

(Includes catalog numbers beginning with 17, 18)

Hoosier drag tires can be mounted to rotate in either direction. Hoosier drag tires can also be flipped or reversed to provide even wear.

WARNING

Verify Correct Wheel and Bead Flange: All tires are designed to be used on wheels that are manufactured to Tire and Rim Association (T&RA) specifications and tolerances. Some rims are non-standard or damaged and it is necessary to inspect the rim flange to assure proper fit. Consult your specific rim manufacturer to determine if your rim can be used in this application. Never attempt to install and inflate a tire of one bead diameter on a rim or wheel of a different bead diameter. Use of Hoosier Racing Tires on wheels with incorrect bead flanges or wheels that do not meet T&RA standards can cause the assembly to fail and burst with explosive force sufficient to cause serious personal injury or death.

WARNING

Special Tire Mounting Instructions: Tire changing should be done only by trained personnel using proper tools and procedures. Failure to follow safe mounting procedures could cause faulty positioning of the tire and cause the assembly to burst with explosive force sufficient to cause serious injury or death. Always inspect tire for kinked beads or other possible damage that may have occurred in shipping or storage. Clean rim and lubricate beads with rubber lubricant. Always lock rim on mounting machine or place in safety cage. Use a clip on chuck, an in-line valve with a pressure gauge or adjustable regulator and remote inflation/deflation device. Have enough air hose to stay out of the trajectory. Stand back. (Refer to page 15).

WARNING

When seating beads never exceed maximum bead seating pressure as molded in tire sidewall. Never exceed manufacturer's maximum inflation pressure.

RACING TIRE

**Visit Your Local Hoosier Tire Distributor
To See the NEW 2008 High Performance
Racing Tires and Apparel Line Up!**

Racing has been a part of our lives for over 50 years! Watching Americans come to embrace the excitement of the track – while experiencing the rise of the sport to the forefront, has been a thrill and an honor we feel fortunate to have been a part of.

We proudly present our high performance racing tires and our apparel and accessories catalog in hopes that these quality products will help you show winning Hoosier spirit everywhere you go!

On behalf of the Hoosier Racing family,
thanks for your support and enthusiasm.
